the MEASAT Telehealth Solution

Join the Sihat Xpress Network

Revolutionizing Healthcare Access and Management

Revolutionizing Healthcare Access and Management

Our Vision

Revolutionizing healthcare access and management

Making healthcare accessible regardless of geo-location or socioeconomic status

National Alignment

Aligns with Malaysia's national objectives to digitalise all healthcare facilities by 2031

Ensures equal access to quality healthcare services for all

Our Goal

Enabling at least 1,000 doctors to support up to 1,500 rural communities

Deploying these kiosks through the CONNECTme NOW networks within the next two years

Impact and National Healthcare Objectives

Impact

- MEASAT, through its CONNECTme NOW service, enables the Sihat Xpress initiative, bringing telehealth services to up to 1,000,000 unserved and underserved individuals in rural areas
- MEASAT's satellite connectivity supports equitable healthcare access for all

National Goals

- Empowering 1,000 clinics to support 1,500 Sihat Xpress kiosks by 2031 paving the way to serve the rural communities through digital healthcare transformation
- Uplifting service delivery to all Malaysians through innovative telehealth solutions

Telehealth Benefits

- A cost-effective method to address gaps in high-quality healthcare delivery in remote areas
- Collecting data to support public health planning for better outcomes

What is

Sihat Xpress is a pioneering mini-clinic solution that offers individuals the ability to connect with physicians via telemedicine and perform point-of-care testing

Our platform enables users to proactively manage their health by providing routine vital assessments and consistent medical availability without the need for clinic visits

By empowering patients with insights into their health patterns, Sihat Xpress facilitates proactive measures to prevent potential illnesses

patients.
